CHILD SEATS

Whatever age your children are, Renault puts their safety first, with a tailor made solution. 60,000 children in Europe are injured each year in accidents, often through the lack of a child seat or use of an inappropriate one. To better understand how to protect them in serious collisions, Renault participated in the European research programmes CHILD and CREST, based chiefly on the observations made from 669 real-life car accidents with children on board. For each new car, Renault ensures that seats can be correctly fitted and that they meet particularly rigorous protection requirements.
